

# Files Connect Repository Resources

A Files Connect repository is an external content repository that's connected to Salesforce. Use these resources to get a list of repositories, to get information about a repository or a repository file, and to get the content of a repository file. Also use these resources to get information about the files and folders in a repository folder. Use these resources to get a repository's directory entries, permissions, and permission types. Also use these resources to update a repository's permissions.

Available resources:

Resource	Description
<a href="#">/connect/content-hub/repositories</a>	Get a list of Files Connect repositories.
<a href="#">/connect/content-hub/repositories/repositoryId</a>	Get information about a Files Connect repository.
<a href="#">/connect/content-hub/repositories/repositoryId/directory-entries</a>	Get the user and group directory entries of a repository.
<a href="#">/connect/content-hub/repositories/repositoryId/files/repositoryFileId</a>	Get information about or update a Files Connect repository file.
<a href="#">/connect/content-hub/repositories/repositoryId/files/repositoryFileId/content</a>	Get the content of the repository file from the external system. The content is streamed as the body of the response.
<a href="#">/connect/content-hub/repositories/repositoryId/files/repositoryFileId/previews</a>	Get information about a repository file's supported previews.
<a href="#">/connect/content-hub/repositories/repositoryId/files/repositoryFileId/previews/formatType</a>	Get a repository file preview or a specific page in a preview.
<a href="#">/connect/content-hub/repositories/repositoryId/folders/repositoryFolderId</a>	Get information about a repository folder.
<a href="#">/connect/content-hub/repositories/repositoryId/folders/repositoryFolderId/allowed-item-types</a>	Returns item types that are allowed to be created in the repository folder.
<a href="#">/connect/content-hub/repositories/repositoryId/folders/repositoryFolderId/items</a>	Get information about the files and folders in a repository folder. Create a file in a repository folder.
<a href="#">/connect/content-hub/repositories/repositoryId/item-types</a>	Returns information about an item type associated with a repository.
<a href="#">/connect/content-hub/repositories/repositoryId/items/repositoryItemId/permissions</a>	Get or update the permissions of a repository file.

</connect/content-hub/items/repositoryItemId/repository>

Get Files Connect repository information for a repository file.

Use these files resources to work with references to repository files:

Resource	Description
<a href="/connect/files/fileId">/connect/files/fileId</a>	Get information about or update the version of an existing reference.
<a href="/connect/files/fileId/content">/connect/files/fileId/content</a>	Get the content of the reference. The content is streamed as the body of the response.
<a href="/connect/files/users/me">/connect/files/users/me</a>	Create a reference.
